Benefit from **expertise** in all aspects of **Public Works**

Thanks to its **40 subsidiaries and 90 locations**, NGE is able to wholly independently carry out all types of Public Works projects anywhere in France.

The Group is comprised of a number of companies, recognized for their expertise and know-how **in its 6 businesses**.

It has a sizable fleet of machinery, which is continually upgraded so as to provide the production teams with the tools able to achieve high performance levels.

Multi-expertise, positives for everyone!

- ➔ For large-scale projects, NGE group employs its multi-expertise concept based on a global approach to projects and on a single competent source.
- ➔ Flexibility, responsiveness and increased efficiency are the main benefits of this structure, which is firmly focused on customer interests satisfaction.

Earthworks & Urban Infrastructures: recreating spaces

*General earthworks
Soil treatment - Rock blasting development - Road base and sub-base Development of platforms
Development & servicing
Urban development
Access Road Networks*

*Water industry works (AEP-EU-EP) - Vacuum sewerage - Water treatment and associated hydraulics
Laying and fitting out of dry pipeline networks - Electrical works
Environmental engineering*

Civil Engineering: connecting regions

*Standard and exceptional structures
Urban underpasses Retaining walls
Industrial buildings
Prefab reinforced concrete
Concrete and steel bridges
Structures slipped under railways
Ventilation shafts Wastewater treatment plants
River works - Repairing, reinforcing structures*

An established position on PFI Market

An internal PPP and Concession department permit to NGE to support public actors to develop PFI infrastructures.

The group is involved in several major projects :

- A150 and A88 motorway and Port-Médoc concessions
- A63 motorway and Tarbes' ringroad public-private partnerships

Thanks to its financial engineering and its partners' network, NGE enters the capital of projects' companies.

The heart of its scope stay nevertheless the building phasis, but NGE is also able to ensure the equipments' maintenance.

With this large range of capacities, NGE assert itself as a solid partner for public customers.

Building long-term relations together

Ability to listen, local presence, adaptability, responsibility and commitment are the qualities that NGE's teams employ on a daily basis.

Looking to build long-term relations with their customers, they bring their know-how to carry on projects and establish themselves as preferred partners of public and private players in order to support them with their regional development plans.

Road Building and Road Equipment:
giving direction to the road

*Paving – Concrete road surfaces
Slip-form concrete shuttering
Crash barriers - Sound wall
Traffic guidance systems
High quality urban development*

Geotechnics and Safety Works:
making ground safe

*Soil improvement - Polluted sites work
Reinforcing and retaining of soil and supports - Soil grouting - Difficult access works - Special foundations -
Drilling - Pile driving - Deflector nets*

Railway construction and maintenance:
improving a network

*Railway construction, maintenance and renewal -
Electrification and catenaries reorganization - Topography and rail softwares' development -
Locomotives maintenance and reconstruction*

*Sharing the values of a Group
where the human factor
is the key to success*

- ➔ The NGE group has an active hiring policy, based on promoting **diversity**. It works notably to encourage the **placement** of young people, whom it trains in the Public Works business and supports on the ground throughout their apprenticeships, thanks to its **mentoring policy**.
- ➔ On projects, the corporate culture encourages management to foster autonomy and responsibility, ensuring everybody's involvement, driven by a shared **passion** for their chosen trade.
- ➔ At the Platform training center, close to 2,000 employees come every year to learn new technical and managerial skills or improve their know-how.

*Combining the satisfaction of every c
that is the commitment brough*

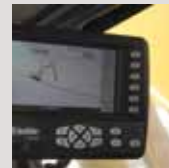

Working under constraints? We provide **tailored solutions**

A complex project on unstable ground, tight deadlines, a confined or sensitive environment...

Experts in all aspects of Public Works, NGE group companies have combined **innovation** and **creativity** to develop a high degree of expertise in the design of specific solutions to particular problems.

*Customer with respect for the environment and others,
t to projects by every NGE group team member.*

Sustainable development: a concrete and shared goal

While NGE's work is primarily designed to improve everybody's quality of life, in particular by facilitating travel, communications or access to resources, the Group also continually strives to **limit the environmental** impact of all its works.

NGE runs a Quality Safety Environment (QSE) initiative throughout every region and subsidiary.
